

FACT: WASHINGTON D.C.
HAS A RODENT PROBLEM.*

FACT: YOU CAN HELP PREVENT
RODENTS FROM ENTERING
YOUR ROOM.

Keep your room/apartment clean.

Rodents and bugs are attracted to food and trash.

Prevention Tips

Keep food in airtight, sealed containers

Put trash in trash cans and take to dumpsters/trash
rooms frequently

Regularly sweep, vacuum, and wipe down
counters and tables

Pick up clothing and papers from the floor and
closets (pests look for these types of places to
burrow and nest)

Report holes and gaps in windows, doors, or walls.
We want to ensure these are sealed to prevent pest
entry into your room or apartment.

Anytime you see a rodent or have a bug issue,
submit a work request or call (202) 687-3432.
